Restriction/Election

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 22-23 drawn to an assembly kit, classified in class 347, subclass 108.
- II. Claims 1-21, 24-25 and 27-31 drawn to an ink container, classified in Class 347, subclass 87.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. (M.P.E.P. § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination of Group I does not require the subcombination of Group II. For example, invention I has separate utility such as an assembly kit for forming an ink container which does not have a particular structure of an ink container as claimed in the invention II. Thus the invention I and the invention II are distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
